One reason for this unpreparedness is a lack of substantive knowledge in mathematics. Another, perhaps even a more important reason, is that students lack the necessary skills and habits required for successful study of mathematics. The book is also useful for high school students preparing for a college. This is also a textbook for students, who studied at high school, maybe several years back, and now have to quickly recover and/or study anew some rudimentary elementary mathematics, so that they can pass the college level classes necessary for their major. As illustrations of basic arithmetic and elementary algebraic concepts, certain notions of the elementary statistics are introduced. This is...
