Solution Tree, United States, 2011. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book. Mind, brain, and education (MBE) is a growing field that is incorporating neuroscience and cognitive and educational psychology into the world of education. While sometimes intimidating, neuroscience offers great insights into our students and how to best reach them. Teachers do not need to become neuroscientists to accomplish this, but having a basic understanding of the brain and how it operates can serve as a solid foundation for designing optimal classroom environments, curricula, and instructional strategies. Think Big, Start Small pares down the vast field of neuroscience and provides educators with simple brain-compatible strategies that will make a difference in their differentiated classrooms.
